Privately published under the auspices of the

EXECUTIVE COMMITTEE OF THE

FRIENDS OF THE ARMY MEDICAL LIBRARY

Washington, D. C.

GUIDES TO THE PERIODICAL LITERATURE

Those of us responsible for the Current List of Medical Literature are deeply grateful to the many Friends who have expressed their approval of this project and made suggestions for its improvement. Answers to some of the questions which have been asked are given in the notices and comments published on the inside covers of succeeding issues of the Current List. There is, however, one question about which many of our Friends may be curious and that is the underlying motive behind this rather novel undertaking.

The answer is that it is an experiment to determine whether research workers can be more economically and efficiently informed of the source literature of science by a catalogue of titles and microfilm copying than by the far more costly method of abstracting and indexing.

Some of the deficiencies of indexes and abstracting services are described in a report by a Committee of the American Library Association published in the April 1st, 1938, number of The Library Journal. Among those enumerated are (1) duplication in some fields, (2) incompleteness of coverage in others, (3) time lag before appearance of the abstracts and indices, and (4) their excessive cost, especially on the "Service basis" to the larger libraries. To these may be added the economic waste in republishing in condensed form, papers which have already cost large sums for their printing, and which are of interest only to the limited numbers of workers in each highly specialized field of research. Furthermore the time devoted to preparing abstracts by highly trained men could in many cases be more profitably spent in the solution of the problems upon which they are engaged. It may also be mentioned that abstracts are frequently misleading and often serve simply to eliminate irrelevant papers rather than to reveal the essential facts contained in the original communication. It may well be questioned whether the value of abstracts bears an equitable relation to their cost.

The usual means by which a knowledge of the literature of science is gained are: (1) By reading the limited number of journals at ones disposal, (2) By the perusal of the published lists of titles of papers (with or without abstracts) compiled from large numbers of widely scattered journals, (3) By the use of references found in the papers one reads and those listed in reviews and bibliographies, and (4) By searching the exhaustive cumulative index catalogues

(Continued on inside back cover)

CURRENT LIST OF MEDICAL LITERATURE is published weekly and lists of RECENT BOOK ACQUISITIONS are issued several times per year as supplements. The subscription price for both is \$5.00 per year in the United States and \$5.50 per year in other countries. The Recent Book Acquisitions may be obtained separately at \$1.00 per year. Address communications to:

Medicofilm Service
Army Medical Library,
Washington, D.C.

1. Anatomy, Embryology, Morphology

J. Morph., 1941, 68:

- CHAPMAN, W. McL. The osteology and relationships of the isospondylous fish, *Plecoglossus altivelis* Temminck and Schlegel. 425-55.
- DEVEY, G.B. The blood cells of the Haitian tarantula and their relation to the moulting cycle. 457-91, incl. 2 pl.
- GOODRICH, H.B., & HEDENBURG, M. The cellular basis of colors in some Bermuda parrot fish with special reference to blue pigment. 493-505, incl. 2 pl.
- GUER, Y., & CHIUNG PUH, Y. A histological study of the stomach and caecum in the genus *Pheretima*, Oligochaeta. 507-17, incl. pl.
- PLAGO, J.C. The thymus gland in relation to sex hormones and reproductive processes in the albino rat. 519-45.
- BERRY, R.O. Chromosome behavior in the germ cells and development of the gonads in *Sciara ocellaris*. 547-83, incl. 3 pl.
- LOWRY, O.F., BEAMS, H.W., & KING, R.L. The fibrillae of the uterine cells of *Ascaris equorum*, variety *univalens*. 595-92, incl. pl.
- LOCHHEAD, J.H., & LOCHHEAD, N.S. Studies on the blood and related tissues in *Artemia*, Crustacea Anostraca. 593-632.

3. Bacteriology, Microbiology

Bact. Rev., Balt., 1941, 5:

- SABIN, A.B. The filtrable microorganisms of the pleuropneumonia group. 1-67, incl. pl.
- SEIBERT, F.B. The chemistry of the proteins of the acid-fast bacilli. 69-95.

4. Biology

Arq. biol., S. Paulo, 1941, 25:

- MINGOJA, Q. Estrutura química das vitaminas K. 53-61.
- PASQUALIN, R. Atividade biológica e indicações terapêuticas das vitaminas K. 62-70.
- CARINI, A. *Piroplasmídeos do sangue de um boiador do Brasil*. 71.
- BELTRAO, R. *Novos casos agudos de molestia de Chagas no Rio Grande do Sul*. 73.
- ARQUELLES, A.S. The Bureau of Science and pharmaceutical research. 73-9.
- SIMPAO, R. Process development in totaquina manufacture. 80-4.
- TANCHOCO, F. Remarks. 84-7.
- CARREON, F. The need for the nationalization of pharmaceutical and related products. 88-94.

Biol. Bull., 1941, 80:

- FERGUSON, J.K.W., & BLACK, E.C. The transport of CO₂ in the blood of certain fresh-water fishes. 139-52.
- TUNG, TI-CHOW, KU, SU-IWEI, & TUNG, YU-FUNG-YEH. The development of the ascidian egg centrifuged before fertilization. 153-68.
- BERRILL, N.J. The development of the bud in *Botryllus*. 169-84.
- BERRILL, N.J. Size and morphogenesis in the bud of *Botryllus*. 185-93.
- JENNINGS, R.H., & WHITAKER, D.M. The effect of salinity upon the rate of excystment of *Artemia*. 194-201.

- CORNMAN, I. Sperm activation by *Arbacia* egg extracts, with special reference to echinoderms. 202-7.
- SCHNEIDER, B.A. The nutritional requirements of *Tribolium confusum* Duval; the survival of adult beetles on patent flour and complete starvation diets. 208-27.
- RAHN, H. The pituitary regulation of melanophores in the rattlesnake. 228-37, incl. pl.
- PORTER, K.R. Diploid and androgenetic haploid hybridization between 2 forms of *Rana pipiens*, Schreber. 238-64.
- FOWLER, C. The relation between hydrogen-ion concentration and volume, gel/sol ratio and action of the contractile vacuole in *Amoeba proteus*. 265-74.

J. Marine Biol. Ass. U. K., 1941, 25:

- LYSAGHT, A.M. The biology and trematode parasites of the gastropod *Littorina neritoides* (L.) on the Plymouth breakwater. 41-67.
- ROTHSCHILD, M. The effect of trematode parasites on the growth of *Littorina neritoides* (L.) 69-80.
- LOWNDES, A.G., & PANIKKAR, N.K. A note on the changes in water content of the lobster, *Homarus vulgaris* M.-Edw., during moult. 111.

6. Cardiology

Mod. Concepts Card. Dis., 1941, 10:

- REYERSBACH, G. Auriculoventricular conduction time of normal children and of rheumatic children without signs of rheumatic activity. No. 5, 1.

7. Chemistry

J. Biochem., Tokyo, 1940, 32:

- KOYANAGI, J. Biochemisches Studium über das Chaulmoograöl; der Einfluss der Chaulmoograöl-Injektion auf die Organ-Fettstoffe. 317-27.
- FUJIMURA, S. Studies on the heterogenetic antigen; studies on the antibody detecting substance. 329-53.
- ITIBAKASE, M. Ueber die fermentative Spaltbarkeit von Dioxopiperazinen; fermentative Spaltung von Dioxopiperazincarbonsäuren. 355-69.
- TUNO, S. Studien über die Harnprotease; über die Krebsdiagnose mittels der Harnprotease. 371-88.
- YAMAMOTO, C. A method for determining sugar and glycogen in the tissues by orcinol-sulphuric acid method. 389-99.
- TOMOTA, S. Ueber die Bakterienargininase; Argininspaltung durch *Salmonella enteritidis* Gartneri. 401-3.
- TOMOTA, S. Ueber die Bakterienargininase; über die Staphylokokkenargininase. 405-17.
- TUNO, S. Studien über die Harnprotease; über das Auftreten der Harnprotease bei Sarkomkaninchen. 419-23.
- SAKAMOTO, T. Ueber die Verteilung des Vitamins A in tierischen Geweben. 425-36.
- SAKAMOTO, T. Ueber die Verteilung von Vitamin A₁ und A₂ in Fischen. 437-42.
- FUJITA, A., & SAKAMOTO, T. Ueber die Bestimmung von Vitamin A₂ nebst Vitamin A₁. 443-9.
- TUKAMOTO, M. Ueber die Synthese der stereoisomeren 3,6-Dioxycholsäure aus 3,6-Diketocholsäure. 451-60.

- TUKAMOTO, M. Synthese der isomeren Dioxycholansäure aus 3,7-Diketocholelsäure und der Dioxyallocholelsäure aus 3,6-Diketoallocholelsäure. 461-5.
- TUKAMOTO, M. Synthese der α -3- α -6- und α -3- β -6-Dioxycholansäure aus α -3-Oxy-6-Ketocholelsäure und der β -3- α -6- und β -3- β -6-Dioxycholansäure aus β -3-Oxy-6-Ketocholelsäure. 467-72.
- TUKAMOTO, M., & KATAOKA, Y. Beiträge zur Kenntnis der Fischgalle; die Galle des Haze- (*Acanthogobius flavimanus*) und Tobihaze-Fisches (*Periophthalmus cantonensis*). 473-5.

8. Dentistry, Stomatology

Am. Ass. Orthodont. (1940) 1941, 38:

- MURRAY, W.A. President's address. 1-4.
- SMITH, R.A. Treatment requiring tipping and bodily movement of teeth. 5-12.
- HOFFMAN, W.M., & SCHOUR, I. Quantitative studies in the development of the rat molar; alveolar bone, cementum, and eruption, from birth to 500 days. 13-33.
- HELLMAN, M. Orthodontic results many years after treatment. 34-44.
- WILKINSON, L., ROHDE, A.C., & MILLIETTE, G.T. Factors contributing to facial growth and development; symposium. 45-71.
- MILLIETTE, G.T. Factors contributing to facial growth and development; some practical applications of these factors. 62-71.
- FRANCIS, C.C. The record of health. 72-81.
- KLATSKY, M. A cinefluorographic study of the human masticatory apparatus in function. 82-8.
- BRODIE, A.G. Some recent observations on the growth of the face and their implications to the orthodontist. 89-105.
- PETERSEN, W.F. Prenatal factors in facial development; mandibular malformation. 106-29.
- JOHNSON, J.E. The construction and manipulation of the twin-wire mechanism. 129-42.
- HIGLEY, L.B. Lateral head roentgenograms and their relation to the orthodontic problem. 143-53.
- SIERSMA, G.H., SHANLEY, L. ET AL. The use of chrome alloy. 154-9.
- JACKSON, A.F. A snap-channel, tie-lock attachment. 160-5.

Am. J. Orthodont., 1941, 27:

- MCCOY, J.D. Naming dental anomalies; a study in orthodontic nomenclature. 169-78.
- PETERSEN, W.F. Prenatal factors in facial development; amandibular malformation. 179-201.
- JOHNSON, J.E. The construction and manipulation of the twin-wire mechanism. 202-15.
- PIERCE, H.F. The significance of diagnosis in medicine. Oral Surg. 169-71.
- SCHAEFER, J.E. Correction of malocclusion by surgical interference. Oral Surg. 172-8.
- AIENBERG, M.S. Studies of retained deciduous teeth. Oral Surg. 179-84.
- OGUS, W.I., & BAKLOR, M.K. Sterilizing the root canals by desiccation; electrosurgery. Oral Surg., 185-9.
- PADGETT, E.C. The late care of severe injuries of the face and jaws. Oral Surg., 190-207.
- KNOPF, S. Swellings of the face, jaw, and neck in oral diagnosis. Oral Surg., 208-13.
- CLARKE, C.D. Moulage prosthesis. Oral Surg., 214-25.

Dent. Items, 1941, 63:

- MCCALL, J.O. Preventive dentistry as it is and as it should be. 410-23.

- REISSNER, A. The dental organotherapy. 424-37.
- NOVITZKY, J. Hypercirculation induced by moist heat. 438-42.

of literature provided in certain fields of research.

In each of these cases, except the first, one learns merely of the existence of papers and is able to consult the originals only by going to or borrowing from libraries. The particular merit of a combination such as the Current List of Medical Literature and a microfilm copying service is that it provides the most convenient and trustworthy means of gaining a wide knowledge of the literature and places those persons at a distance from adequate library collections on an equal footing with those in their immediate vicinity.

In addition to the low publication cost and minimum amount of technical aid required for the compilation of current lists of titles of papers, they can be issued with far less time lag and much greater completeness than is possible for any abstracting or indexing service. They also have the advantage of permitting those who are in the habit of scanning the journals to peruse the tables of contents of a far larger number than is possible in any other way. They avoid the disadvantages resulting from circulating journals among the workers of large institutions. An hour or two per week devoted to the perusal of a catalogue of titles such as the Current List of Medical Literature should enable a specialist in any branch of medicine to locate, and by means of a microfilm copying service, to obtain promptly copies of all recent original papers of interest to him.

Catalogues of titles of papers can be made for any large or small field of research with no other technical assistance than that of the person who selects the journals or individual papers to be included. All other steps in the process are performed by typists and persons skilled in processes of photo duplication. It is an advantage, but not necessary, that all the periodicals from which the titles are gathered should be received at one central place. Finally the addition of indices to catalogues of the titles of research papers, make them complete guides to both the current and prior literature and enable them to replace in all essential respects the far more costly abstracting services.

In the case of the Current List of Medical Literature, the question of an index is still unsettled, but the matter is being carefully studied, especially in respect to the most convenient and economical arrangement of such an index. It is hoped that before the end of its first year the number of subscriptions to the Current List will be sufficient to cover the cost of providing it with an excellent index.

A. S.
